SUMMARY

I am a highly skilled and experienced software developer with over 20 years of experience in the industry.

I am a valuable asset to any individual or organization looking to improve their software development skills. My drive for excellence and extensive knowledge of Angular, React, JavaScript, TypeScript and Tailwind CSS have made me a recognized expert in the industry.

EXPERIENCE

Senior Software Developer
Abdelfattah Ragab

01/2019 - Present
Giza, Egypt

My own company that works with customers on a B2B basis
- **Achievements in React:**
- Developed and optimized a complex React-based web application, enhancing user experience and engagement.
- Implemented Redux for state management in a large-scale React project, improving code organization and maintainability.
- Created reusable React components and libraries, streamlining development and ensuring code quality.
- Integrated third-party APIs and libraries into React applications, expanding functionality and user experiences.
- **Achievements in Angular:**
- Developed and delivered a scalable Angular application, showcasing expertise in component-based architecture and reactive programming.
- Implemented advanced features like lazy loading and dynamic form validation, enhancing application functionality.
- Designed modular Angular applications for easy maintenance and future scalability.
- Optimized performance through code splitting and lazy loading techniques, improving load times and user experience.
- Integrated Angular with backend APIs for seamless data flow and communication.
